

Abstract of the Disclosure

ind
All

A digital camera includes a processor and a microphone. The camera captures audio speech and converts the speech to text. The text can be combined with a captured image to provide a composite file. The processor executes an instruction set which preforms the audio to text conversion. Text conversion is activated using either a user
5 activated input control, or through voice commands.

"Express Mail" mailing label number: EL530190752VS

Date of Deposit: October 7, 1999
